# 2007

# AGM

# Republic Gold in FNQ

**RAU commenced its FNQ  
exploration activities looking  
for refractory gold deposits &  
has now extended this to  
looking for antimony,  
tungsten & now tin.**

# The Team

**Chairman:** Peter Wicks – 40 years experience in accounting & resources.

**Managing Director:** John Kelly - 25 years experience as a mining engineer.

**Technical Director:** Neb Zurkic – 18 years experience as a geologist, including 10 years with Newmont, the world's largest gold company.

**Non-Executive Director:** Greg Barns – a barrister & former CEO of the Australian Gold Council.

**Company Secretary:** Ros Shand – a lawyer with 10 years resource company secretarial experience.

**The Team:** Chris Roberts, Trevor Jackson, Sue Brickl, Dallas Cox, Dave Foster, Steve King, Kerrin Allwood & Dave Williams and his fieldies.

# RAU Share Price

# Available Funding

- RAU is well cashed up.
- Current cash on hand is \$8.8m.
- There are 158m listed options and 43m directors, employees & other options which could raise a further \$5.8m.

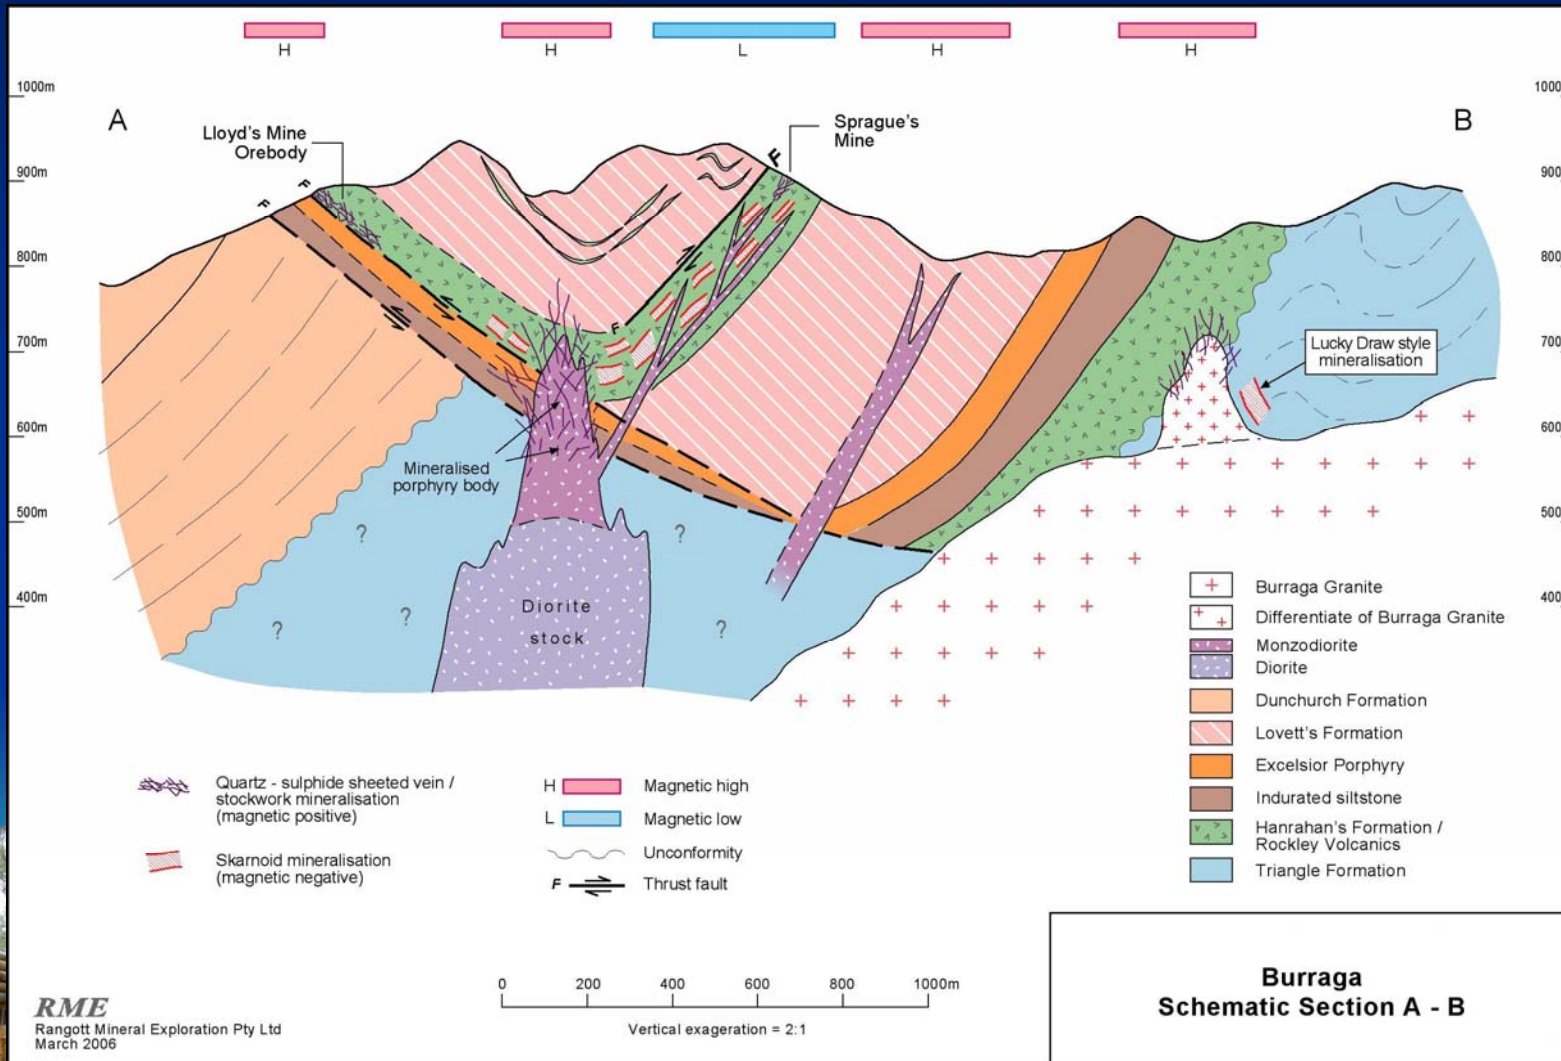

# Where we are

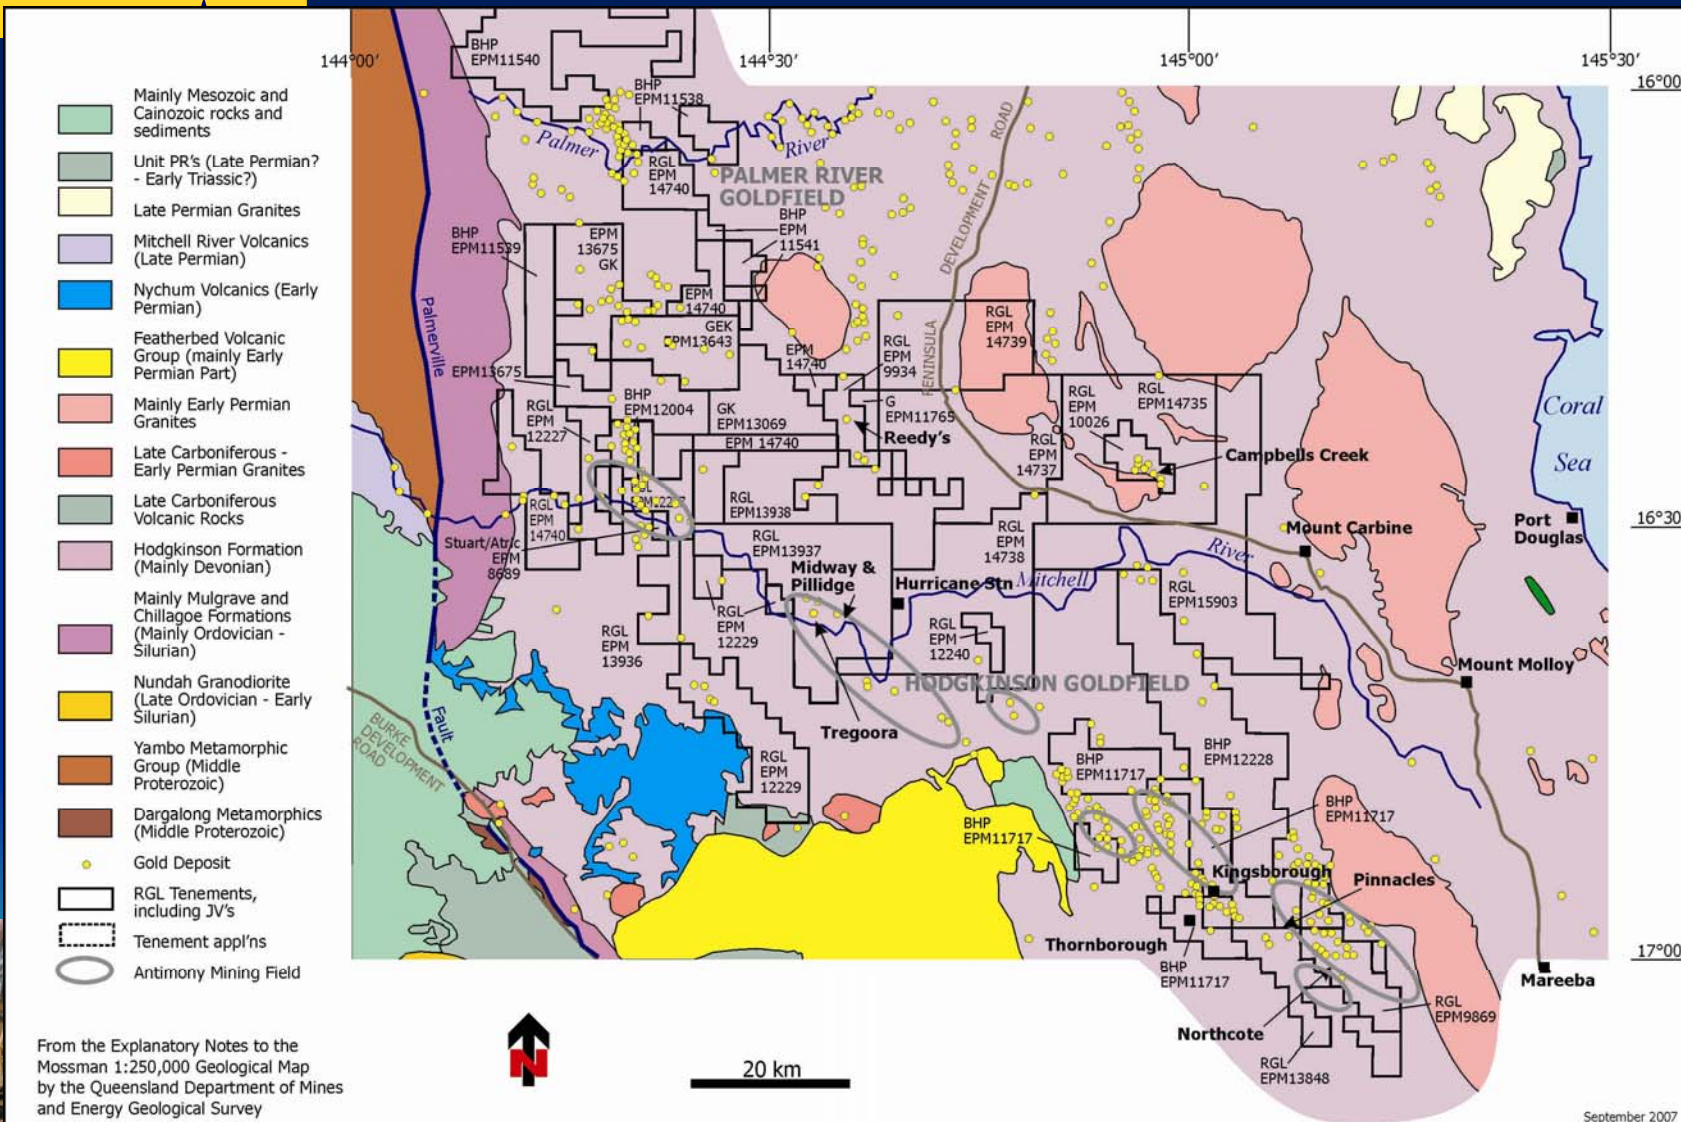

# RGL

# Whumbal West - Tungsten

# Cannibal Creek Greisen New Tungsten Area

**RGL**

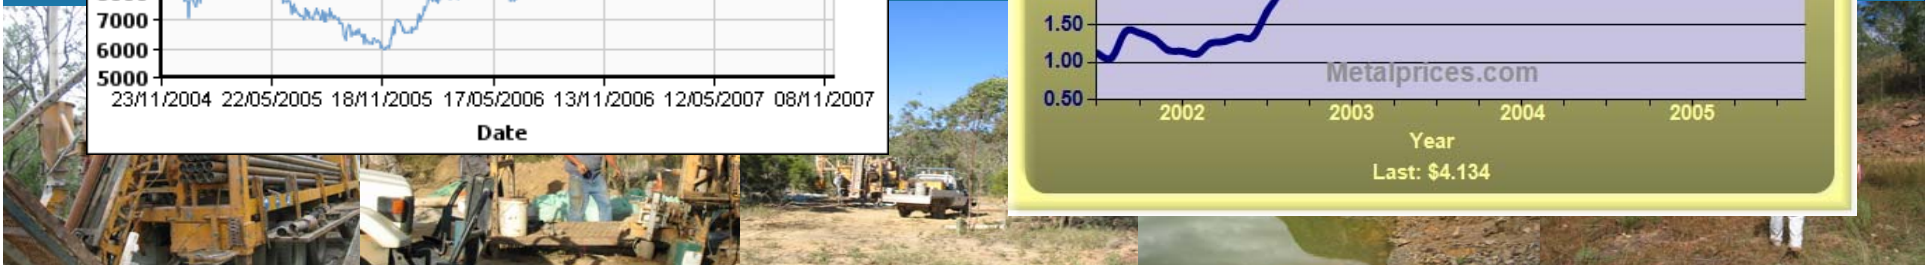

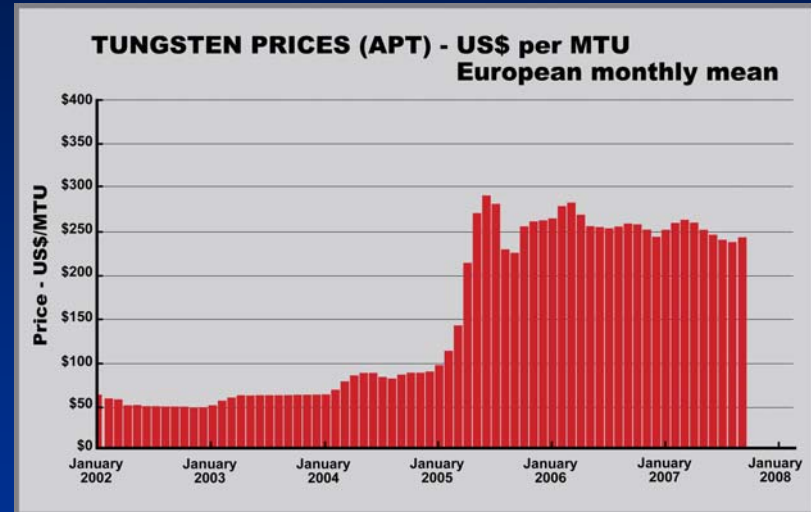

# Target Metals in FNQ

- Apart from gold, RAU is actively looking for antimony, tungsten & most recently tin. The Hodgkinson Basin is a rich region for all these metals.
- In the recent past the prices of all these metals has risen significantly.
- The price rises of tungsten & antimony has risen largely due to demand and shortfall in supply in China.
- The Company has fielded a number of enquiries from China for supply of metal concentrates to smelters.

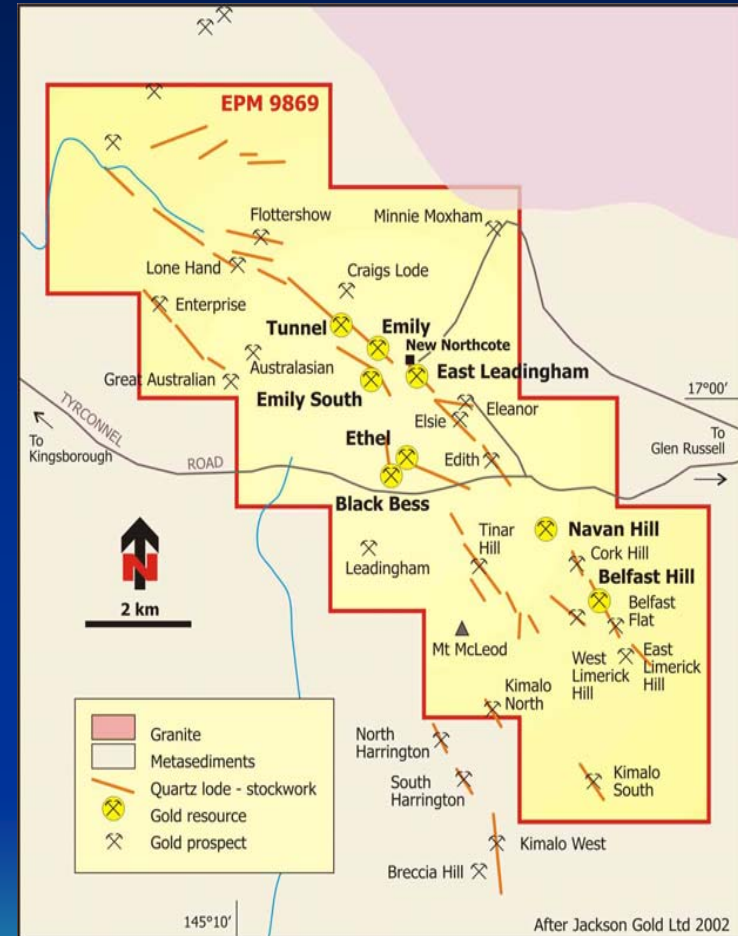

# Target Metal Prices

# RGL

## Northcote

- Results of recent diamond drilling programme are awaited.
- Characteristically of moderate grade but very consistent.
- Equity resource of 195,000 oz Au.
- 80% of the resource is now in the measured & indicated categories.

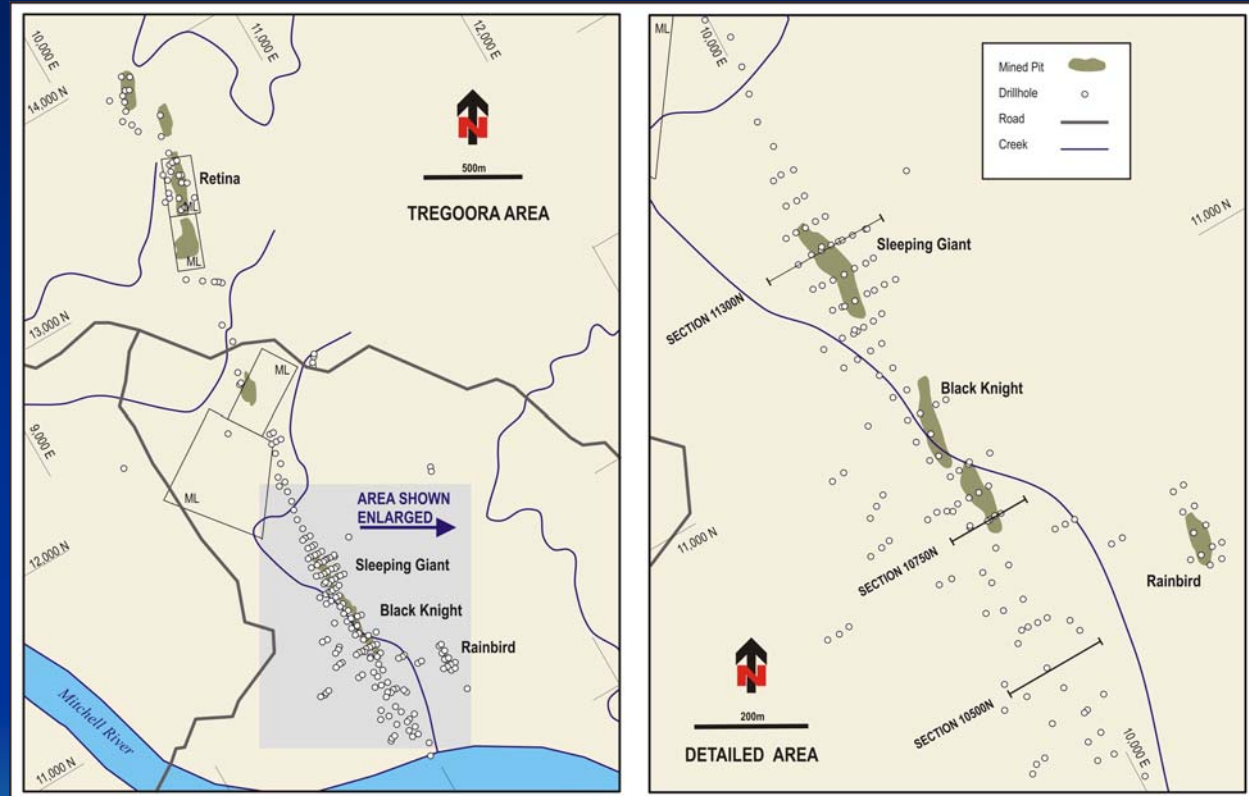

RGL

# Sleeping Giant- Tregoora

- Significant previous oxide mining.
- Good grade & widths over km's of strike.
- A JORC resource of 156,000 oz Au, 60% in the indicated category.
- Drilling was recently completed on the Far North Prospect.

# Gold Feasibility Study Northcote & Tregoora

- The sulphide testwork has successfully investigated the amenability of the mineralisation to bacterial oxidation using the **GEOCOAT®** process.
- The metallurgy of the antimony mineralisation has given encouraging results.
- The gold and antimony resources are in the two high quality JORC categories.
- The Company has advanced mine permitting significantly.
- Preliminary mine development scenarios have been progressed.
- Potential supplies of limestone and fresh water for the bacterial oxidation process have been investigated.
- A number of mining leases have been applied for.

# JORC Compliance Statement

Information in this report that relates to mineral resources for Republic Gold Limited is based on information compiled by Chris Roberts, a member of the Australasian Institute of Mining and Metallurgy and the Australian Institute of Geoscientists and on information estimated by Kerrin Allwood a member of the Australasian Institute of Mining and Metallurgy, both of whom have a minimum of five years experience in the estimation, assessment and evaluation of mineral resources and ore reserves. Chris Roberts and Kerrin Allwood have significant experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity which they are undertaking to qualify as a Competent Person as defined in the 2004 edition of the “Australasian Code for Reporting of Mineral Resources and Ore Reserves”. Chris Roberts and Kerrin Allwood consent to the inclusion in this report of these matters based on the information in the form and context in which it appears.
